Iffo Elsande Pratama Putra

AI & Data Professional | Data-Driven Solutions | Machine Learning, Data Science, Analytics & Engineering | Python & SQL
Surabaya, East Java, Indonesia

Summary

I am an Informatics Engineering graduate from Universitas Negeri Surabaya (UNESA), graduating with honors (GPA: 3.85/4.00), with a passion for transforming data and technology into impactful, data-driven solutions.My background spans Artificial Intelligence, Machine Learning, Data Science, Data Analytics, and Software Development, with hands-on experience in predictive modeling, data processing, intelligent automation, and application development.Currently, I work as an AI Engineer Intern at PT Platinum Ceramics Industri, developing AI-powered document validation solutions. My work involves end-to-end Document AI pipelines integrating OCR, Vision-Language Models (VLMs), information extraction, rule-based validation, and web applications.As a freelance Machine Learning Engineer, I have worked on data preprocessing, classification, predictive modeling, model evaluation, and analytical reporting. My project experience also includes forecasting, data visualization, computer vision, and reinforcement learning.I further strengthened my technical foundation through the IBM Advanced AI Academy, exploring Generative AI, deep learning, and enterprise AI technologies.Technical Expertise:• AI & ML: Python, TensorFlow, PyTorch, Scikit-Learn• Data Science: Forecasting, Predictive Analytics, Data Preprocessing• Analytics & Visualization: SQL, Pandas, NumPy, Power BI, Tableau• Data Engineering Foundations: Data Transformation, Data Pipelines• Applied AI: OCR, VLMs, Computer Vision, NLP• Development: FastAPI, Django, REST APIs, Docker, GitI am interested in building scalable, data-driven solutions that support business intelligence, automation, and informed decision-making across industries, including manufacturing, technology, and energy.Open to professional connections, collaboration, and opportunities across AI, Data Science, Analytics, and Data Engineering.

Experience

PT. Platinum Ceramics Industry

AI Engineer Intern

August 2026 - Present (3 months)

Surabaya, East Java, Indonesia

Developed an AI-powered document validation system to automate document verification and information extraction.

Built an end-to-end Document AI pipeline integrating OCR, Vision-Language Models (VLMs), document preprocessing, and structured JSON generation.

Implemented rule-based validation and document matching mechanisms to identify inconsistencies across extracted information.

Developed a web-based application to support document validation and structured result visualization.

Evaluated extraction performance and analyzed failure cases to improve system reliability.

Skills: Python, Artificial Intelligence, OCR, Vision-Language Models, Document AI, Information Extraction, Web Development

Cons Code

Machine Learning Engineer — Freelance

July 2024 - August 2026 (2 years 2 months)

Surabaya, East Java, Indonesia

Developed Python-based machine learning solutions for classification and predictive modeling based on client requirements.

Performed data cleaning, preprocessing, and transformation using Pandas and NumPy.

Supported data analysis and generated structured reports to communicate insights to non-technical stakeholders.

Evaluated machine learning models using accuracy, precision, recall, F1-score, and AUC-ROC.

Skills: Python, Machine Learning, Data Analysis, Pandas, NumPy, Predictive Modeling

PT. Radnet Digital Indonesia

Web Development Intern

October 2024 - January 2025 (4 months)

Surabaya, East Java, Indonesia

Developed company profile and e-commerce websites using Django, from development through deployment.

Built responsive web interfaces and integrated back-end functionality using Django and REST APIs.

Configured and maintained Linux-based deployment environments.
Collaborated with development teams on client projects and participated as a speaker in a web development webinar attended by 20+ participants.
Skills: Python, Django, REST APIs, Web Development, Linux, Deployment

Infinite Learning Indonesia
AI Engineering Intern — IBM Advanced AI Academy
February 2024 - June 2024 (5 months)
Batam, Riau Islands, Indonesia

Completed structured training in Generative AI, deep learning, and enterprise AI applications through the IBM Advanced AI Academy.
Practiced developing and evaluating deep learning classification models using TensorFlow and PyTorch.
Explored Large Language Models, AI governance, and enterprise data management using IBM watsonx.data.
Studied cybersecurity, data privacy, and responsible AI practices.
Skills: Generative AI, Deep Learning, TensorFlow, PyTorch, IBM watsonx, AI Governance

Education

Universitas Negeri Surabaya
Bachelor's Degree, Computer Science · (August 2021 - January 2026)
